This document is approximately 518 words long.

Some time ago, I read *Dawn Behind the Dawn, A Search for the Earthly Paradise*, by Geoffrey Ashe. I was particularly interested in his comments about the special reverence that is often accorded to the number seven. Since I read the book, I've become somewhat sensitized to occurrences of the number seven when there doesn't seem to be any real reason for it. I'm not saying that the number seven necessarily has any inherent special properties but people do seem to act as if it does.

Since I read the book, I've been noting down occurrences of the number seven when there didn't seem to be any logical reason why that number should have been there. This document is that list. I'll probably update it from time to time.

*Wikipedia* has an interesting article about the number seven. See the references section.
